

Key information: Critical links between downregulated glycopeptides functional enrichment and substructure features.

a: Key information on GOCC enrichment of the fucose counts substructure in downregulated IGPs.
b: Key information on GOMF enrichment of the sialic acid structures substructure in downregulated IGPs.
c: Key information on GOBP enrichment of the fucosylated types substructure in downregulated IGPs.
d: Key information on GOCC enrichment of the fucosylated types substructure in downregulated IGPs.
