

StrucGAP_GlycanStructure_3: Co-occurrence patterns among glycan substructure features.

a: Co-occurrence analysis revealing preferential pairing between core structures and branch structures.
b: Co-occurrence analysis revealing preferential pairing between branch structures and branch structures.
c: Co-occurrence analysis revealing preferential pairing between branch structures and core structures.
d: Co-occurrence analysis revealing preferential pairing between core structures and LacdiNAc.
e: Co-occurrence analysis revealing preferential pairing between core structures and glycan types.
f: Co-occurrence analysis revealing preferential pairing between core structures and branch counts.
g: Co-occurrence analysis revealing preferential pairing between core structures and sialic acid counts.
h: Co-occurrence analysis revealing preferential pairing between core structures and fucose counts.
i: Co-occurrence analysis revealing preferential pairing between core structures and fucosylated types.
j: Co-occurrence analysis revealing preferential pairing between core structures and sialylated types.
k: Co-occurrence analysis revealing preferential pairing between LacdiNAc and core structures.
l: Co-occurrence analysis revealing preferential pairing between LacdiNAc and glycan types.
