

StrucGAP_GlycanStructure_4: Co-occurrence patterns among glycan substructure features (continued).

a: Co-occurrence analysis revealing preferential pairing between LacdiNAc and branch structures.
b: Co-occurrence analysis revealing preferential pairing between LacdiNAc and branch counts.
c: Co-occurrence analysis revealing preferential pairing between LacdiNAc and sialic acid counts.
d: Co-occurrence analysis revealing preferential pairing between LacdiNAc and fucose counts.
e: Co-occurrence analysis revealing preferential pairing between glycan types and LacdiNAc.
f: Co-occurrence analysis revealing preferential pairing between glycan types and core structures.
g: Co-occurrence analysis revealing preferential pairing between glycan types and branch structures.
h: Co-occurrence analysis revealing preferential pairing between glycan types and branch counts.
i: Co-occurrence analysis revealing preferential pairing between glycan types and sialic acid counts.
j: Co-occurrence analysis revealing preferential pairing between glycan types and fucose counts.
