- a: Co-occurrence analysis revealing preferential pairing between fucosylated types and branch counts.
b: Co-occurrence analysis revealing preferential pairing between fucosylated types and sialic acid counts.
c: Co-occurrence analysis revealing preferential pairing between fucosylated types and fucose counts.
d: Co-occurrence analysis revealing preferential pairing between fucosylated types and sialylated types.
e: Co-occurrence analysis revealing preferential pairing between sialylated types and core structures.
f: Co-occurrence analysis revealing preferential pairing between sialylated types and glycan types.
g: Co-occurrence analysis revealing preferential pairing between sialylated types and branch structures.
h: Co-occurrence analysis revealing preferential pairing between sialylated types and branch structures.
i: Co-occurrence analysis revealing preferential pairing between sialylated types and sialic acid counts.
j: Co-occurrence analysis revealing preferential pairing between sialylated types and fucose counts.
k: Co-occurrence analysis revealing preferential pairing between sialylated types and fucosylated types.
