

a: Comparison of core structures in up- versus downregulated IGPs.
b: Ratio of core structures in up- versus downregulated IGPs based on total number of related glycan.
c: Comparison of glycan types in up- versus downregulated IGPs.
d: Ratio of glycan types in up- versus downregulated IGPs based on total number of related glycan.
e: Comparison of branch structures in up- versus downregulated IGPs.
f: Ratio of branch structures in up- versus downregulated IGPs based on total number of related glycan.
g: Comparison of branch number in up- versus downregulated IGPs.
h: Ratio of branch number in up- versus downregulated IGPs based on total number of related glycan.
i: Comparison of sialic acid count in up- versus downregulated IGPs.
j: Ratio of sialic acid count in up- versus downregulated IGPs based on total number of related glycan.
k: Comparison of fucose count in up- versus downregulated IGPs.
l: Ratio of fucose count in up- versus downregulated IGPs based on total number of related glycan.
