

Key information: Core findings in altered substructural features.

a: Key information from substructure: core structures.  
b: Comparison of core structures in up- versus downregulated IGP.  
c: Ratio of core structures in up- versus downregulated IGP based on total number of related glycan.  
d: Comparison of glycan types in up- versus downregulated IGP.  
e: Ratio of glycan types in up- versus downregulated IGP based on total number of related glycan.  
f: Comparison of branch structures in up- versus downregulated IGP.  
g: Ratio of branch structures in up- versus downregulated IGP based on total number of related glycan.  
h: Key information from substructure: branch counts.  
i: Comparison of LacdiNAc in up- versus downregulated IGP.  
j: Ratio of LacdiNAc in up- versus downregulated IGP based on total number of related glycan.
